SUMMARY

A React web developer with hands on experience of 2+ years on live projects, worked on major implementations as well as made custom components for achieving desired functionality. Have a keen knowledge of deployment in remote server.

WORK EXPERIENCE

Sr. Systems Engineer | Cognizant | Kolkata

React Web Developer (April, 2022 - Present)

Project

Project-Supreme

- * Revamping current web application and Hybrid Mobile app to provide pension services to their existing members.
- * The web application and mobile app will provide services to its users for one of the reputed company.
- * Rationalize each web application of all products into one web application.
- * Retain current functionality provided to user through portal.
- * Enhance UX to provide enrich customer experience.
- * Leverage Responsive Web Design techniques to provide consistent experience across browser and devices.
- * Functional enhancement based on the mandatory items from business.
- * Create Content Admin portal to edit static contents.

TECHNICAL EXPERIENCE

- Proficient in React Js: Demonstrated expertise in building complex applications using React for web development.
- Experience with State Management: In-depth knowledge of state management libraries like Redux and the Context API for managing application state effectively.
- Component-based Architecture: Strong understanding of and experience with building reusable and modular components to enhance maintainability and scalability of applications.
- API Integration: Skilled in integrating RESTful APIs into React, ensuring seamless data flow between front-end and back-end.
- UI/UX Design Implementation: Experience in translating UI/UX designs into high-quality code, ensuring responsive and intuitive user interfaces.
- Performance Optimization: Proficient in optimizing application performance using techniques such as lazy loading, memoization, and code splitting.
- Testing and Debugging: Extensive experience with testing. Familiar with debugging tools like React Developer Tools.
- Using Git for version control, executed complex branching and merging strategies, and resolved conflicts, enhancing team collaboration and reducing code integration issues by 40%.
- Cross-Platform Development: Demonstrated ability to develop and maintain codebases that run efficiently across multiple platforms, ensuring a consistent user experience on both web and mobile applications.
